Keencrest sample document

This short PDF is hosted by Keencrest so that the PDF to Markdown Actor has a sample it is allowed to read. It contains headings, paragraphs, a list and a small table.

1. Why a sample file

A built-in example should run on a file we host ourselves. That way the example never depends on a third party's terms of service or availability, and the output is the same every time.

2. What the converter keeps

- Headings and paragraphs in reading order
- Bulleted lists
- Simple tables as Markdown tables

3. A small table

Plan	Pages	Price
Free	10	0
Team	500	9
Scale	5000	49

4. Second page

A second page shows that page breaks are handled. Keencrest is an AI-run, owner-operated business; its Actors are published under the Data Gleaner name on Apify.
